Engaged employees are more likely to provide better customer service, as they are more enthusiastic, attentive, and committed to delivering high-quality experiences

- Gallup (2013), State of the American Workplace Report.

When employees feel engaged and valued, they are more likely to contribute ideas and solutions, fostering a culture of innovation.

- Deloitte (2015). Global Human Capital Trends: Leading in the New World of Work.

Organizations with high employee engagement tend to outperform their competitors

- Gallup (2017). State of the American Workplace Report.

Engagement Solutions

Start "Emotional Agility" Coaching Sessions

Host monthly, 15-minute one-on-one sessions where managers coach employees on Emotional Agility—helping them identify areas where they feel emotionally stuck (e.g., frustration, indecision) and guiding them on how to pivot their mindset.

Impact: Helps employees navigate emotional challenges, boosting resilience and adaptability in high-pressure situations.

"Empathy Hours" for Cross-Department Shadowing

Dedicate one hour each month where employees can shadow a colleague from a different department, followed by a reflective session on how they've gained new perspectives.

Impact: Boosts empathy by exposing employees to the challenges and experiences of their colleagues, enhancing collaboration and understanding across teams.

Design "EQ Pulse Checks" with Real-Time Feedback Tools

What it is: Use real-time feedback tools (like Officevibe or 15Five) to implement quick, anonymous “EQ pulse checks” that ask questions about emotional well-being, teamwork, and stress levels.

Impact: Managers get immediate insights into team morale and emotional health, allowing for timely interventions and support.
